# Digital Risk Assessments

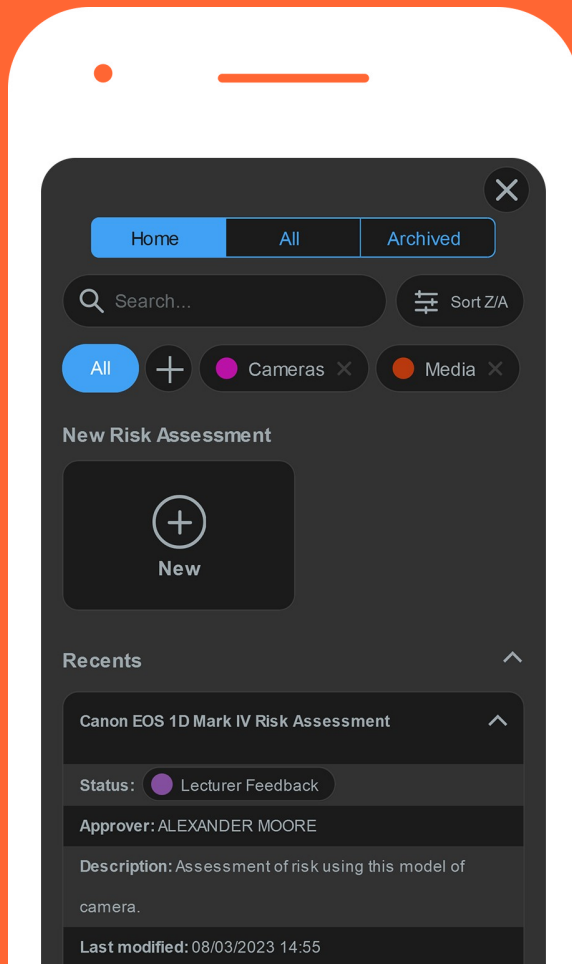

Easy to find in a centralised hub.

A feature that lets you easily create customised risk assessments. Speeds up completion and allows you to manage and track approval.

[More information](#)

# Key Features

- Each section can be customised to your requirements
- Tagging enables you to quickly find specific templates
- Customised approval processes
- Validation reduces errors & highlights missing information

# Benefits

- Saves time : Templates, favourites, cloning, hazards, drag and drop features all speed up the process
- Reduces risk: Ensuring risk assessments have been completed and approved before activities take place
- Minimises errors: Tools such as field validation, approval processes and admin tools means you can easily show compliance
- Status: Email notifications and dashboards, everyone knows what they have to do
