# 05 Maintenance

Repairs, Calibration, Scheduling, Warranty

To make it easier to manage your assets, rooms and equipment; there are a wide range of tools in the maintenance area of the system.

"Smarthub has allowed us improve several of our processes - PAT testing, inventory management, equipment lifecycle management, risk-assessments and repair management. I can't recommend it more"

Christian Yeo — Technical Supervisor, School of Journalism, Media & Cultural Studies

How does it help you

- **Planning & efficiency:** Schedule maintenance in advance at appropriate times

- **Tasks are not missed:** Notification to personnel for tasks, such as calibration or servicing

- **Better utilisation of equipment:** Equipment is available for a higher percentage of time

- **Makes stock audits quicker & easier:** Use mobile scanners to quickly collate status and location of equipment

Key product features

- Schedule maintenance
- Job and task tracking
- Parts inventory
- PAT testing
- Third party contracts / suppliers
- Incident tracking
- Servicing images, guides and documentation
- Repair and status inspection
